# Proceedings of the Institution of Mechanical Engineers

## Volume 200, 1986

### Index compiled by Geoffrey C Jones

The 1986 published Proceedings of the Institution of Mechanical Engineers include four journals (nineteen issues), thirteen conference volumes and nine seminar volumes. Each entry in the index comprises a code which refers to the relevant journals or volume follwed by the page number. The titles with their respective codes are as follows:

| | |
|---|---|
| **A** | Power and Process Engineering (journal, issues A1 to A4) |
| **B** | Management and Engineering Manufacture (journal, issues B1 to B4) |
| **C** | Mechanical Engineering Science (journal, issues C1 to C6) |
| **D** | Transport Engineering (journal, issues D1 to D4) |
| **D(S)** | The Jaguar XJ40 Project (special issue of Part D, issue D5) |
| **AWD** | All-wheel Drive Systems |
| **CG** | Technical and Economic Impact of Co-generation |
| **CP** | Radial Loads and Axial Thrusts on Centrifugal Pumps |
| **CR** | Cleanroom Design |
| **EC** | Applications of Engineering Ceramics |
| **EE** | Practical Limits of Efficiency of Engines |
| **FCG** | Fatigue and Crack Growth in Offshore Structures |
| **FEMi** | Fatigue of Engineering Materials and Structures, Volume I |
| **FEMii** | Fatigue of Engineering Materials and Structures, Volume II |
| **FRC** | Fibre Reinforced Composites 1986 |
| **HVE** | Heart Valve Engineering |
| **IET** | Integrated Engine Transmission Systems |
| **NPS** | Training of Technical Staff for Nuclear Power Stations |
| **PAM** | Planning for Automated Manufacture |
| **PBF** | Petroleum Based Fuels and Automotive Applications |
| **PE** | Postal Engineering |
| **SAE** | Structural Adhesives in Engineering |
| **SEF** | Size Effects in Fracture |
| **TB** | The Bus '86 |
| **TT** | Turbocharging and Turbochargers |
| **UKR** | UK Research in Advanced Manufacture |
| **WT** | Water Treatment for Modern Power Plant Boilers |

# Author Index

Abdul, N A Process analysis of a starter clutch sleeve extrusion (*discussion*) B215
Acar, B S Evaluation of a new approach to design and process planning UKR131
Achyutha, B T A method for reducing the corner wear in plunge grinding B19
Adachi, S Influence of mean stress on fatigue crack nucleation in ($\alpha + \beta$) titanium alloys FEMi67
Adam, T A power law fatigue damage model for fibre reinforced plastic laminates C155
The fatigue behaviour of Kevlar/carbon hybrid composites FEMii329
Adams, R D Low-velocity impact inspection of bonded structures SAE139
The mechanics of bonded joints SAE17
Use of the Fokker bond tester on joints with varying adhesive thickness SAE149
Agnew, B Examination of the use of a variable compression ratio piston in a spark ignition engine EE77
Ahmad, K Computation and experimental results of wear in a slurry pump impeller C439
A theoretical and experimental investigation of axial thrusts within a multi-stage centrifugal pump CP89
Aiba, M The influence of corrosive environment on impact fatigue of structural steel FEMii347
Akers, A Dynamic analysis of an axial piston pump swashplate control C49
Albin, F T The technical development and market exploitation of novel manufacturing techniques for high-speed plain bearings B77
Alexander, G I A detailed study of compact exhaust manifolds applied to automotive diesel engines TT269
Allan, P S Thick section fibre reinforced thermoplastics injection moulding FRC95
Allan, R C The use of adhesives in the repair of cracks in ships' structures SAE169
Allinson, J C The armoured fighting vehicle power pack IET135
Anderson, U Variable geometry turbocharging – control under transient conditions TT227
Andersson, K A study of the influence of some parameters on the stability and handling of inter-city coaches TB29
Anderton, J Fluid forces on pivoted disc prosthetic heart valves HVE21
Andrews, M J Development of a service support system for micropressor-controlled vehicle electrical systems D(S)43
Ang, L A A computer model for vibrating conveyors B123
Appleton, R J Corrosion fatigue of a C–Mn steel in sea water solutions FCG77
Archard, J F Elastohydrodynamic lubrication – improvements in analytic solutions C281
Archer, J R Actuation for industrial robots B85
Armstrong, K B British Airways experience with composite repairs SAE183
Armstrong, P J Robotics handling of composite materials in a lay-up cell UKR39
Arrowsmith, M J The design and development of the XJ40 seating system D(S)79
Ashton, E W S The need for a business to renew itself B65
Atkins, A G Elastic versus plastic fracture (*book review*) C227
Austen, I M New developments in the computer control of fatigue machines FEMii485
Backhouse, J R Developments in philatelic machinery PE85
Electronic developments in franking machines PE241
Bader, M G Fatigue growth of transverse ply cracks in (0/90$^2$)$_s$ glass fibre reinforced plastic FRC173
Badr, O Multi-vane expanders as prime movers in low-grade energy engines A117
Baggett, F W Hydrostatic transmission for steering high-speed military track laying fighting vehicles IET163
Baglin, K P Elastohydrodynamic pressure rippling in cylinders finished with a circumferential lay C335
Elastohydrodynamic lubrication – improvements in analytic solutions C281
Micro-elastohydrodynamic lubrication and its relationship with running-in C415
Bain, W H Artificial heart valves: can laboratory testing predict long-term clinical performance? HVE53
Baker, J W Complexities inherent in the launching of a capital intensive multi-disciplined project (*discussion*) B145
Baker, R C Computation and experimental results of wear in a slurry pump impeller C439
Baldassari, L ENEL's approach for an optimal integration between teaching aids and training programmes in the nuclear field NPS41
Balding, N Real-time collision-free path calculation for robots UKR61
Baldwin, D A The armoured fighting vehicle powerpack IET135
Banisoleiman, K A comparative assessment of truck transmissions by computer simulation of vehicle performance for typical road routes IET1
Performance of a highly rated vehicle diesel engine with a variable geometry turbocharger TT197
Banthin, C Transverse mounting of gas turbine engine to transmission in US Army tank IET155
Barbenel, J C The mechanical properties of bovine pericardium HVE99
Barnes, C R The technical development and market exploitation of novel manufacturing techniques for high-speed plain bearings B77
Barnes, P Near-threshold fatigue crack growth in an aluminium bronze alloy FEMi137
Barnum, T B Advanced research programme for processing flats and other non-machineable mail PE159
Barry, D C Letter handling techniques in facing machines PE49
Barton, D S Post Office Research Centre, Swindon – an overview PE223
Barton, P H Plastic envelopes PE41
The development of a new keyboard for outward sorting foreign mail PE57
Bashford, D P The novel use of composites in engineering applications FRC141
Basu, S K Modelling total life cycle cost A31; (*discussion*) A293
Battle, K The design of mitred bends – a background to BS 806: 1975 amendment No 3 A51
Baxendale, A E Development of an air mass flow sensing micropressor-based fuelling and ignition system D(S)35
Beddis, M R Tooling in integrated manufacture PAM187
Beech, S M Fatigue of one per cent Cr–Mo–V steel at elevated temperature FEMii469
Beerman, H J The prediction of the energy absorption of composite structural materials FRC179
Beesley, P W Design study for a low heat loss version of the Dover engine D53

© IMechE 1987

Beeston, J W Industrial communications – an overview PAM97
Beevers, A Corona discharge pretreatment of surfaces for bonded joints SAE221
Bell, R A system for the design and evaluation of highly automated batch manufacturing systems UKR85
Bendall, L J B The development of maintenance training for nuclear power station engineers NPS33
Benjamin, S F Computer aided engineering – heat transfer and fluid flow (*book review*) C228
Lean burn engines for low exhaust emissions PBF131
Bennaton, J Evaluation of a new approach to design and process planning UKR131
Bennett, A Development of a cost effective composite automotive exterior body panel FRC257
Bergs, K-H Tilt-tray sorting machine for the sorting of small packets at the Deutsche Bundespost PE151
Berry, S R Clean rooms and controlled environments in industrial applications CR35
Berthe, D Mixed lubrication and lubricated wear (*book review*) C153
Bertilsson, J E Fracture mechanical calculations of a cracked IP rotor coupling FEMii289
Berwick, I D G Key developments in a century of road transport fuels PBF1
Besant, C B Spatial differential energy for the detection and location of multiple moving targets UKR117
Implementation of adaptive positional control and active compliance for robots UKR145
Bett, K E Review of some of the major engineering developments in the high-pressure polyethylene process 1933–1983 A237
Bevis, M J Thick section fibre reinforced thermoplastics injection moulding FRC95
Bhadury, B Modelling total life cycle cost A31; (*discussion*) A293
Bilby, B A A finite element investigation of the effect of specimen geometry on the fields of stress and strain at the tips of a stationary crack SEF37
Billingsley, J The development of a pneumatically-powered walking robot base UKR137
Bilton, G The in vivo durability of bioprosthetic heart valves – modes of failure observed in explanted valves HVE65
Bird, G L The Ford 2.5 litre direct injection naturally aspirated diesel engine (*discussion*) D229
Bird, J The use of adhesives in the repair of cracks in ships' structures SAE169
Black, M M Artificial heart valves – past, present and future HVE1
The in vivo durability of bioprosthetic heart valves – modes of failure observed in explanted valves HVE65
The long-term clinical assessment of heart valve substitutes HVE75
Blackie, A P Cyclic tension corrosion fatigue of three quenched and tempered low-alloy steels in sea water FCG199
Blackmore, D R Development of a novel gasoline additive package – laboratory test work PBF47
Blair, I F Double-deck trains for the Netherlands Railways D15
Blake, A Handbook of materials and structures (*book review*) C153
Bland, C J Autonomous devices for automated assembly UKR111
Bleckmann, H-W The new four-wheel anti-lock generation: a compact anti-lock and booster aggregate and an advanced electronic safety concept D275
Blenkinsop, P T Actuation for industrial robots B85
Blom, A F Ultrasonic fatigue studies of short and long surface cracks FEMi75
Boada, F Modifications to the method of characteristics for the analysis of the gas exchange process in internal combustion engines D259
Boam, D J Energy audit on a two-litre saloon car driving an ECE 15 cycle from a cold start D61
Bodo, L B The properties of diesel fuel as they relate to the operation of fuel injection equipment PBF75
Bolton, W K Ball and roller bearings – theory, design and application (*book review*) C228
Boniface, L Fatigue growth of transverse ply cracks in (0/902)s glass fibre reinforced plastic FRC173
Boo, K S An analysis of the transient nugget formation in resistance spot welds B167
Booth, A H Progress in the design of electric drives for modular robotic systems UKR125
Booth, G S Fatigue tests on welded tubular joints in air and sea water FCG155
Borila, Y G Some aspects of performance optimization of the sequentially turbocharged highly rated truck diesel engine TT251
Boucher, R F Simulation of fluid network dynamics by transmission line modelling C21
Transmission line modelling of a hydraulic position control system B229
Bowditch, M R An underwater adhesive-based repair method for offshore structures SAE113
Bradley, J A The Teaching Company Scheme – the first ten years B277
Braisch, P K The principal factors influencing the fatigue behaviour of surface induction hardened machinery parts FEMii459
Bretherton, I Life prediction for elevated temperature components subjected to cyclic deformation FEMi147
Bristow, J W Airworthiness of composite structures – some experiences from civil certification FRC147
Broadbent, T P Stress analysis of screwed tubular joints FCG171
Brockmann, W G The importance of surface pretreatment prior to bonding SAE61
Brook, R J Engineering ceramics: a promise to be realized EC1
Brown, A C The integrated manufacture, test and installation of telephone exchanges B173
Brown, A M A dynamic modelling technique for the XJ40 body structure design D(S)67
Brown, D K On the analysis of cracked tubular joints FCG93
Brown, M W Aspects of fatigue crack growth FEMi93
Brown, M W G Evaluation of a variable geometry turbocharger turbine on a commercial diesel engine TT179
Broyd, T W Advanced analysis techniques for the design of clean rooms CR17
Bruns, H Safety of high-speed luxury coaches TB13
Bryce, A G Approaching flexible manufacturing system technology in a jobbing environment PAM119
Bryce, W Driveability, fuel consumption and emissions of a 1.3 litre turbocharged spark ignition engine TT139
Buck, K E Fracture mechanical calculations of a cracked IP rotor coupling FEMii289
Buckley-Golder, I M Applications of ceramic films EC33
Burdekin, F M Fracture mechanics analysis of fatigue crack propagation in tubular joints FCG31
Burdess, J S The dynamics of a thin piezoelectric cylinder gyroscope C271
Burnett, G P Design study for a low heat loss version of the Dover engine D53

© IMechE 1987

Burns, N D A constrained optimization technique to improve the performance of strain gauge transducers C135
Burton, N T Implementation of a flexible manufacturing system to make parts in a small batch environment PAM89
Busby, J L The development of the E40 letter sorting machine PE131
Butcher, M C A Integrated manufacture – from concept to reality PAM37
Butler, J S Electra Mk2 – a code mark checking machine PE265
Byrne, J Near-threshold fatigue crack growth in an aluminium bronze alloy FEMi137
Byrne, J L Experience with ceramic rotor turbochargers TT77

Caddock, B D The role of diffusion in the micromechanisms of stress corrosion cracking of E-glass/polyester composites FRC55
Calladine, C R Plasticity for engineers (*book review*) C77
Came, P M Development of the MET-SC turbocharger TT113
Campbell, J The technical development and market exploitation of novel manufacturing techniques for high-speed plain bearings B77
Canning, M S Bismaleimide resins – the properties of compimide BMI-resins FRC13
Cannon, M J An experimental study of crack-tip electrochemistry during corrosion fatigue of structural steel in sea water FCG69
Cardew, G E A finite element investigation of the effect of specimen geometry on the fields of stress and strain at the tips of a stationary crack SEF37
Cardrick, A W How future UK military aircraft will be designed for tolerance to fatigue damage FEMi15
Carmichael, G D T An assessment of primary system stresses on the creep behaviour of high-temperature steam piping systems A197
The design of mitred bends – a background to BS 806:1975 amendment No 3 A51
Carrie, A S Some planning problems in flexible manufacturing systems PAM113
Carruthers, A In-service engineering support of the Tornado D185
Carswell, W S Fatigue and damage in fibre reinforced nylon FRC211
Carter, D L Training for change – implementation of automated manufacture PAM177
Cartwright, A J The development of a high comfort, high stability rear suspension D(S)53
Case, K Evaluation of a new approach to design and process planning UKR131
Cathcart, L Laboratory assessment of the design, function, and durability of pericardial bioprostheses HVE57
Catton, P G Advanced manufacturing technology – evaluating the intangible benefits PAM17
Cawley, P Low-velocity impact inspection of bonded structures SAE139
Use of the Fokker bond tester on joints with varying adhesive thickness SAE149
Chaboche, J L Fatigue life prediction in notched specimens FEMii503
Chaharbaghi, K Application of simulation in planning the design of flexible assembly systems UKR95
Chakraborty, D K Automatic transmissions and brake retarders for transit buses – a comparative test under operating conditions TB117
Chan, C L A detailed study of compact exhaust manifolds applied to automotive diesel engines TT269
Chan, T S Modelling of a controller for a flexible manufacturing cell B217
Chan, W T W Fracture mechanics analysis of fatigue crack propagation in tubular joints FCG31
Chan, W K The determination of stress intensity factors and crack-tip velocities from thermoelastic infra-red emissions FEMi105
Chapman, C R Development of assessment procedures at the CEGB's Nuclear Power Training Centre NPS25
Charlesworth, D Development of a cost effective composite automotive exterior body panel FRC257
Charlton, S J A continuously variable poppet valve actuator for internal combustion engines A187
Chaudonneret, M Fatigue life prediction in notched specimens FEMii503
Chen, K C Life assessment of dovetail joints between blades and discs in aero engines FEMi187
Chen, Y Near-threshold fatigue crack propagation and closure behaviour in an aluminium alloy FEMi115
Chittenden, R J Elastohydrodynamic film thickness in concentrated contacts
Part 1: experimental investigation for lubricant entrainment aligned with the major axis of the contact ellipse C207
Part 2: correlation of experimental results with elastohydrodynamic theory C219
Chng, S C A computer model for vibrating conveyors B123
Cho, H S An analysis of the transient nugget formation in resistance spot welds B167
Cho, Y J An analysis of the transient nugget formation in resistance spot welds B167
Chohan, R K Effects of manufacturing tolerances on the thermal response of industrial thermometers C265
Choudhury, S N R Integrated rural energy centres for agriculture-based economies A267
Christiansen, P J Integral ball bearing spindles for front-wheel drive and four-wheel drive vehicles AWD87
Chu, W H Fracture mechanics analysis of fatigue crack propagation in tubular joints FCG31
Chu, W-Y Corrosion fatigue crack initiation in a mode II notch specimen FEMii353
Chuang, P D Spatial differential energy for the detection and location of multiple moving targets UKR117
Chung, K R An efficient method for compensating truncated higher modes in structural dynamics modification C41
Ciselli, F European driving influence on exhaust catalyst development PBF139
Civita, P ENEL's approach for an optimal integration between teaching aids and training programmes in the nuclear field NPS41
Clarke, A D Development of a service support system for micropressor-controlled vehicle electrical systems D(S)43
Clarke, J D An underwater adhesive-based repair method for offshore structures SAE113
The use of adhesives in the repair of cracks in ships' structures SAE169
Clement, P The growth of short fatigue cracks in an aluminium alloy in relation to crack closure effect FEMi59
Cogswell, F N Thermoplastic composites in woven fabric form FRC1
Cole, R D Additive solutions to diesel combustion problems PBF55

Colley, C R Complexities inherent in the launching of a capital intensive multi-disciplined project (*discussion*) B145
Collie, A A The development of a pneumatically powered walking robot base UKR137
Collings, N Knock detection by audible, accelerometer pressure and ionic current methods PBF123
Collins, B M Automatic vehicle monitoring experience TB75
Connolly, M P Fatigue fracture mechanics assessment of tubular steel welded Y and K-joints FCG117
The measurement and analysis of fatigue crack growth in tubular welded Y and K-joints FEMi129
Cooley, P Look at it this way B55
Cooper, D J Tooling in integrated manufacture PAM187
Cooper, J F Initial fatigue crack growth at spot welds FEMii283
Cooper, M G Air treatment design for clean rooms CR1
Corberan, J M Modifications to the method of characteristics for the analysis of the gas exchange process in internal combustion engines D259
Cordova, D S Computer modelling of hybrid reinforced thermoset FRC89
Cottis, R A The influence of sea water corrosion on the fatigue strength of steel wire rope FEMii387
Cowen, G Section pultrusions of continuous fibre reinforced thermoplastics FRC105
Cowling, M J Corrosion fatigue of a C–Mn steel in sea water solutions FCG77
Craig, T J Postbuckling behaviour of cylindrically curved composite plates with clamped edges FRC69
Crawford, R G Engineering aspects of the West Midlands guided bus experiment TB53
Crawford, R J Plastics and rubbers – engineering design and application (*book review*) C78
Cresswell, E The design of mitred bends – a background to BS 806: 1975 amendment No 3 A51
Crofts, C E Pericardial heterografts: a method for leaflet mechanical property control HVE103
Crookall, J R Computer integration of advanced manufacture B257
Crossland, B Review of some of the major engineering developments in the high-pressure polyethylene process 1933–1983 A237
The changing face of fatigue FEMi1
Cucchi, C European driving influence on exhaust catalyst development PBF139
Cullen, E G E Contracting automation projects PAM133
Cummins, C Lyle Jr William Dent Priestman, oil engine pioneer and inventor – his engine patents 1885–1901 A69
Cure, K G A quantum management/employee change of philosophy PAM167
Curran, J P J Robotics handling of composite materials in a lay-up cell UKR39
Curtis, C H Energy storage systems for public service vehicles IET117
Curtis, P T Fatigue of composite materials FEMii297

Dabrowski, J F D The relationship between the fatigue performance of valves and body shape rules FEMi33
Dale, A Vaneless radial turbocharger turbine performance TT65
Dale, D W The redesign of a manufacturing business UKR151
Daley, S A design study of a self-organizing fuzzy logic controller C59
A study of a fast self-tuning control algorithm C425
Dalling, J B Dispensing equipment for production SAE47
Damen, J T W Mechanized sorting of mail using the index PE31
Dansel, J Computer aided design for factory planning PAM149
Darling, J Cylinder pressure transients in oil hydraulic pumps with sliding plate valves B45
Darlington, M W Designing with short fibre reinforced thermoplastics FRC39
Davey, S N A knowledge-based approach to robotic assembly UKR79
Davies, B L Application of simulation in planning the design of flexible assembly systems UKR95
Davies, E R Engineering trade-offs in the design of a real-time system for the visual inspection of small products UKR15
Davies, G A O Tensile behaviour of unidirectional glass/carbon hybrid laminates FRC225
Davies, J B C Programmable fixturing for flexible manufacturing systems UKR31
Davis, D C Fluid transmission lines – distributed parameter models
Part 1: a review of the state of the art A215
Part 2: comparison of models A229
Davison, A P The durability of adhesive bonds FRC231
Day, P S TD tyres for Jaguar D(S)61
Deacon, G E A knowledge-based approach to robotic assembly UKR79
Dearie, W M Recent developments in ion exchange technology for the production of high quality demineralized water WT19
DeHart, A O The design of an engine-flywheel hybrid drive system for a passenger car D231
de Koning, C H M The influence of peening on the fatigue behaviour of flat plates and tubular joints made of coarse grained material FEMii443
Denton, A D Cycle counting and reconstitution, with application to the aircraft fatigue data analysis system FEMi231
de Silva, A Surface effects on alloys drilled by electrochemical arc machining B237
Dharmavasan, S Stress analysis of overlapped K-joints FCG17
Dickson, H M K A theoretical and experimental investigation of axial thrusts within a multi-stage centrifugal pump CP89
Dickson, R F A power law fatigue damage model for fibre reinforced plastic laminates C155
The fatigue behaviour of Kevlar/carbon hybrid composites FEMii329
Dijkstra, O D The influence of peening on the fatigue behaviour of flat plates and tubular joints made of coarse grained material FEMii443
Ding, C Near-threshold fatigue crack propagation and closure behaviour in an aluminium alloy FEMi115
Dodd, B Advanced fracture mechanics (*book review*) C77
Dominy, J The nature of slip in high-speed axially loaded ball bearings C359
Doolan, T M Monitor automation at IBM Greenock PAM71
Dorey, G Fatigue of composite materials FEMii297
Dorey, R E Hydraulic accumulator energy storage in a city bus IET105
The modelling of losses in mechanical gear trains for the computer simulation of heavy vehicle transmission systems IET69
Dover, W D Corrosion fatigue of tubular welded T-joints FCG135
Fatigue assessment of tethers FCG187
Fatigue fracture mechanics assessment of tubular steel welded Y and K-joints FCG117
